Infosafe No™ 3CHCD RE-ISSUED by ACR Issue Date : September 2021

Product Name SILVER NITRATE Solution 0.1-1.0% LR

Not classified as hazardous

### 1. Identification

**GHS Product Identifier** 

SILVER NITRATE Solution 0.1-1.0% LR

AUSTRALIAN CHEMICAL REAGENTS (ACR) (ABN 19 008 264 211) **Company Name** 

38 - 50 Bedford Street Gillman Address

S.A. 5013 Australia Tel: (08) 8440 2000 Telephone/Fax Fax: (08) 8440 2001

**Emergency phone**

#### Other Information

Business hours: 8:30am to 5:00pm, Monday to Friday.

Australian Chemical Reagents (ACR) does not warrant that this product is suitable for any use or purpose. The user must ascertain the suitability of the product before use or application intended purpose. Preliminary testing of the product before use or application is recommended. Any reliance or purported reliance upon Australian Chemical Reagents (ACR) with respect to any skill or judgement or advice in relation to the suitability of this product of any purpose is disclaimed. Except to the extent prohibited at law, any condition implied by any statute as to the merchantable quality of this product or fitness for any purpose is hereby excluded. This product is not sold by description. Where the provisions of Part V, Division 2 of the Trade Practices Act apply, the liability of Australian Chemical Reagents (ACR) is limited to the replacement of supply of equivalent goods or payment of the cost of replacing the goods or acquiring equivalent goods.

### 2. Hazard Identification

GHS classification of

substance/mixture

Classified as non-Hazardous according to the Globally Harmonised System of classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.

Not classified as dangerous goods according to the Australian Dangerous Goods Code (ADG).

# 3. Composition/information on ingredients

Ingredients	Name	CAS	Proportion	
	Water	7732-18-5	99-99.9 %	
	Silver nitrate	7761-88-8	0.1-1 %	

### 4. First-aid measures

Inhalation Remove to fresh air.

Rinse mouth thoroughly with water immediately, repeat until all traces of Ingestion

product have been removed. DO NOT INDUCE VOMITING. Seek medical advice if

effects persist.

Wash affected areas with copious quantities of water. Remove contaminated Skin

clothing and wash before re-use. If rapid recovery does not occur, obtain

(as Ag)

Infosafe No™ 3CHCD RE-ISSUED by ACR Issue Date : September 2021

Product Name SILVER NITRATE Solution 0.1-1.0% LR

Not classified as hazardous

Immediately irrigate with copious quantity of water for at least 15 minutes. Eye contact

Eyelids to be held open. In all cases of eye contamination it is a sensible

precaution to seek medical advice.

Maintain eyewash fountain and safety shower in work area. **First Aid Facilities** 

**Advice to Doctor** Treat symptomatically based on judgement of doctor and individual reactions of

the patient.

Other Information For advice, contact a Poisons Information Centre (Phone eg Australia 13 1126;

New Zealand 0800 764 766) or a doctor.

5. Fire-fighting measures

Hazards from Combustion

Oxygen, toxic fumes, toxic oxides of nitrogen, nitrous gases, metallic silver,

silver oxides.

Does not burn.

**Products** 

No limitations to the type of extinguishing media. Use extinguishing media **Specific Methods** 

most appropriate for the surrounding fire.

Specific hazards

arising from the

chemical

Precautions in

Wear SCBA and structural firefighter's uniform.

connection with Fire

6. Accidental release measures

**Personal Precautions** Avoid substance contact.

**Personal Protection** Wear protective clothing specified for normal operations (see Section 8)

Clean-up Methods -**Small Spillages** 

Absorb or contain liquid with sand, earth or spill control material. Shovel up using non sparking tools and place in a labelled, sealable container for

subsequent safe disposal. Put leaking containers in a labelled drum or

**Environmental** 

**Precautions** 

Prevent from entering into drains, ditches, rivers or the sea.

**Other Information** Most organisations using silver compounds collect all silver residues for

subsequent recovery. Solutions could be treated with a salt solution and the

resulting silver chloride collected for subsequent recovery.

7. Handling and storage

**Precautions for Safe** 

Handling

Avoid contact with eyes, skin, and clothing. Avoid ingestion. Avoid prolonged or repeated exposure. Wear suitable protective clothing. Wash thoroughly after

handling.

Conditions for safe storage, including any incompatibilities Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances. Keep well closed and protected from

direct sunlight and moisture. Light sensitive. Aqueous solutions are incompatible with alkali and alkaline earth metals and many reactive organic

and inorganic chemicals.

Refer Australian Standard AS 3780-1994 'The storage and handling of corrosive **Storage Regulations** 

substances'.

Storage

exposure limit values

Store at room temperature (15 to 25 °C recommended).

**Temperatures** 

Unsuitable Materials Organic materials.

8. Exposure controls/personal protection

TWA STEL Occupational Name

mg/m3 ppmmg/m3 ppm Footnote Silver nitrate 0.01 Silver, soluble compounds

Print Date: 20/09/2021 CS: 3.4.22

Page: 3 of 5

Product Name SILVER NITRATE Solution 0.1-1.0% LR

Not classified as hazardous

Other Exposure Information

The exposure value at the TWA is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5

day working week.

A time weighted average (TWA) has been established for Silver, soluble compounds (as Ag) (Safe Work Australia) of  $0.01~\text{mg/m}^3$  and for Silver, metal (Safe Work Australia) of  $0.1~\text{mg/m}^3$ . The exposure value at the TWA is the average airborne concentration of a particular substance when calculated over

a normal 8 hour working day for a 5 day working week.

Appropriate engineering controls

Maintain the concentrations values below the TWA. This may be achieved by process modification, use of local exhaust ventilation, capturing substances

at the source, or other methods.

Respiratory

Usually is not required.

Protection Where protection is required from nuisance levels of dust or mists select

respiratory protection that complies with AS 1716 - Respiratory Protective Devices and select in accordance with AS 1715 - Selection, Use and Maintenance of Respiratory Protective Devices. Filter capacity and respirator type depends

on exposure levels.

Eye Protection The use of a face shield, chemical goggles or safety glasses with side shield

protection as appropriate. Must comply with Australian Standards AS 1337 and

be selected and used in accordance with AS 1336.

**Hand Protection** Wear gloves of impervious material conforming to AS/NZS 2161: Occupational

protective gloves - Selection, use and maintenance. Final choice of

appropriate glove type will vary according to individual circumstances. This can include methods of handling, and engineering controls as determined by  $\frac{1}{2}$ 

appropriate risk assessments.

Personal Protective Equipment Personal protective equipment should not solely be relied upon to control risk and should only be used when all other reasonably practicable control measures do not eliminate or sufficiently minimise risk. Guidance in selecting personal protective equipment can be obtained from Australian, Australian/New Zealand

or other approved standards.

Body Protection Clean impervious clothing should be worn. Clothing for protection against

chemicals should comply with AS 3765 Clothing for Protection Against Hazardous

Chemicals.

Hygiene Measures Always wash hands before smoking, eating or using the toilet. Wash

contaminated clothing and other protective equipment before storing or

re-using.

## 9. Physical and chemical properties

Form Liquid

Appearance Clear, colourless liquid.

Odourless.

Melting Point >2 °C

Boiling Point ~ 100 °C

Solubility in Water Miscible.

Specific Gravity ~ 1.04

**pH** 3.0 - 6.0 (25 °C) **Vapour Pressure** 14 mm Hg @ 20 °C

Vapour Density

(Air=1)

0.7

Evaporation Rate >1 (ether=1)

Volatile Component ca. 98 %vol @ 21 °C

Flammability Non flammable.

Molecular Weight 169.87 + aq

Oxidising Properties Dried product residue is a strong oxidizer.

Print Date: 20/09/2021 CS: 3.4.22

Page: 4 of 5

Product Name SILVER NITRATE Solution 0.1-1.0% LR

Not classified as hazardous

10. Stability and reactivity

Chemical Stability Stable at room temperature in closed containers under normal storage and

handling conditions. Light sensitive. Darkens on exposure to light.

Conditions to Avoid Light, air, heat, high temperatures, evaporating to near dryness and

incompatible materials.

Incompatible Materials

Due to low concentration of silver nitrate - none, exception being with

substances reactive to water.

Hazardous Decomposition Products Toxic fumes, toxic oxides of nitrogen, nitrous gases, metallic silver, oxygen,

silver oxides.

Hazardous

Will not occur.

**Polymerization** 

### 11. Toxicological Information

Ingestion
May cause gastrointestinal irritation with nausea, vomiting and diarrhoea.

Effects should be less severe than through exposure to higher concentrations of silver nitrate which may include symptoms of pain and burning in mouth, blackening of the skin and mucous membranes, throat and abdomen, diarrhoea and

shock. A poison in higher concentrations.

Inhalation May cause respiratory tract irritation. May be absorbed into the body

following inhalation with symptoms paralleling those from ingestion exposure.

Skin May cause skin discolouration. Effects are expected to be less severe than for

exposure to higher concentrations where symptoms include redness, pain and

severe burns.

Eye Direct contact with eyes may cause temporary irritation.

Respiratory

Not classified based on available information.

sensitisation

Skin Sensitisation Not classified based on available information.

exposure STOT-repeated

Not classified based on available information.

exposure

nosure

Chronic Effects

Nitrites/nitrates may cause methaemoglobinaemia, which is characterized by chocolate-brown coloured blood, headache, weakness, dizziness, breath

shortness, cyanosis (bluish skin due to deficient oxygenation of blood), rapid

heart rate, unconsciousness and possible death.

Chronic inhalation or ingestion of silver salts may cause argyria characterized by a permanent blue-gray discolouration of the eyes, skin, mucous membranes, and internal organs. This malady results from the

accumulation of silver in the body.

Serious eye damage/irritation

Not classified based on available information.

Skin

Not classified based on available information.

corrosion/irritation

# 12. Ecological information

Ecotoxicity Harmful effect on aquatic organisms. May cause long-term adverse effects in

the aquatic environment.

Silver ions toxic for aquatic organisms.

Persistence and degradability

Methods for the determination of biodegradability are not applicable to

inorganic substances.

Print Date: 20/09/2021 CS: 3.4.22
