CS: 3.4.28

Infosafe No™ 1CHL9

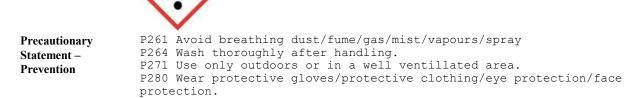

Issue Date :October 2022

RE-ISSUED by CHEMSUPP

Product Name METHYL 4-HYDROXY BENZOATE

Classified as hazardous

Section 1 - Identification		
Section 1 - Identif		
Product Identifier	METHYL 4-HYDROXY BENZOATE	
Company Name	CHEMSUPPLY AUSTRALIA PTY LTD (ABN 19 008 264 211)	
Address	38 - 50 Bedford Street GILLMAN SA 5013 Australia	
Telephone/Fax Number	Tel: (08) 8440-2000	
Emergency Phone Number	CHEMCALL 1800 127 406 (Australia) / +64-4-917-9888 (International)	
E-mail Address	www.chemsupply.com.au	
Recommended use of the chemical and restrictions on use	Antimicrobial agent, inhibition of molds and yeasts and to lesser extent bacteria; as vehicle for ophthalmic solution; food additive (preservative preservative in cosmetics and some parenteral solutions; in vitro spermi- in medicaments for pharyngitis and laboratory reagent.	e),
Other Names	Name Product Code	
Additional Information	Methyl paraben Methyl para-hydroxy benzoate METHYL 4-HYDROXY BENZOATE LR METHYL 4-HYDROXY BENZOATE BP Use in foods restricted to 0.1%. A tolerance of zero is established for residues of methylparaben in milk dairy animals.	from
Other Information	ChemSupply Australia Pty Ltd does not warrant that this product is suital for any use or purpose. The user must ascertain the suitability of the p before use or application intended purpose. Preliminary testing of the p before use or application is recommended. Any reliance or purported reli- upon ChemSupply Australia Pty Ltd with respect to any skill or judgement advice in relation to the suitability of this product of any purpose is disclaimed. Except to the extent prohibited at law, any condition implied any statute as to the merchantable quality of this product or fitness fo purpose is hereby excluded. This product is not sold by description. Whe provisions of Part V, Division 2 of the Trade Practices Act apply, the liability of ChemSupply Australia Pty Ltd is limited to the replacement supply of equivalent goods or payment of the cost of replacing the goods acquiring equivalent goods.	roduct roduct ance or d by r any re the of
Section 2 - Hazard	d(s) Identification	
GHS Classification of the Substance/Mixture Signal Word	Eye Damage/Irritation: Category 2A WARNING	
Hazard Statement (s) Pictogram (s)	H319 Causes serious eye irritation. H335 May cause respiratory irritation. Exclamation mark	

Page: 2 of 6

EyeIf contact with the eye(s) occur, wash with copious amounts of water for approximately 15 minutes holding eyelids(s) open. Take care not to rinse contaminated water into the non-effected eye. If irritation develops seek medical attention.First Aid FacilitiesMaintain eye wash and normal washroom facilities.Advice to DoctorTreat symptomatically based on judgement of doctor and individual reactions o the patient.Other InformationFor advice, contact a Poisons Information Centre (Phone eg Australia 13 1126; New Zealand 0800 764 766) or a doctor.Section 5 - Firefighting MeasuresHazards fromIrritating and highly toxic gases, smoke and fumes, including carbon monoxide and carbon dioxide.ProductsSmall fire: Use dry chemical, CO2, water spray or foam. Large fire: Use water spray, fog or foam. If safe to do so, move undamaged containers from the fire area. Cool containers with flooding quantities of water until well after the fire is out May burn but do not ignite readily. Runoff may pollute waterways. Fire may produce irritating, poisonous and/or corrosive fumes. Containers may explode when heated.Decomposition270 - 280 °C Temperature Precautions in Wear SCBA and structural firefighter's uniform. connection with FireSection 6 - Accidental Release Measures	Infosafe No™	1CHL9 Issue Date :October 2022 RE-ISSUED by CHEMSUPP

Infosafe No™	1CHL9 Issue Date :October 2022 RE-ISSUED by CHEMSUPP
Product Name	METHYL 4-HYDROXY BENZOATE
	Classified as hazardous
Clean-up Methods - Small Spillages	Sweep up (avoid generating dust) and using clean non-sparking tools transfer to a clean, suitable, clearly labelled container for disposal in accordance with local regulations.
Section 7 - Handli	ing and Storage
Precautions for Safe Handling	Avoid ingestion and inhalation of dusts. Avoid contact with skin and eyes. Minimize dust and aerosol generation and accumulation. Keep container tightly closed. Provide appropriate exhaust ventilation at places where dust is formed. Use with adequate ventilation. If ingested, seek medical advice immediately and show the container or the label. Wear appropriate protective equipment. Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Practice good personal hygiene, that is, always wash hands after handling, and before eating, drinking, smoking or using the toilet facilities. Protect against physical damage. Keep away from incompatibles suc as oxidizing agents, alkalis. Employ normal measures for preventive fire protection.
Conditions for safe storage, including any incompatibilities	Store in tightly closed containers, in a cool, dry, well-ventilated area away from incompatible substances. Protect against physical damage, direct sunligh and moisture. Store away from heat, sources of ignition, and oxidising agents
Corrosiveness	Inspect regularly for deficiencies such as damage or leaks. Non-corrosive in presence of glass, of steel, of stainless steel (304), of
Storage Temperatures	stainless steel (316). Store at room temperature (15 to 25 $^\circ$ C recommended).
 Section 8 - Exposu	are Controls and Personal Protection
Other Exposure Information	A time weighted average (TWA) concentration for an 8 hour day, and 5 day week has not been established by Safe Work Australia for this product. There is a blanket limit of 10 mg/m ³ for dusts when limits have not otherwise been established.
Engineering Controls	In industrial situations maintain the concentrations values below the TWA. This may be achieved by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods.
Respiratory Protection	Where ventilation is not adequate, respiratory protection may be required. Avoid breathing dust, vapours or mists. Respiratory protection should comply with AS 1716 - Respiratory Protective Devices and be selected in accordance with AS 1715 - Selection, Use and Maintenance of Respiratory Protective Devices. Filter capacity and respirator type depends on exposure levels. In event of emergency or planned entry into unknown concentrations a positive pressure, full-facepiece SCBA should be used. If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.
Eye and Face Protection	The use of a face shield, chemical goggles or safety glasses with side shield protection as appropriate. Must comply with Australian Standards AS 1337 and be selected and used in accordance with AS 1336.
Hand Protection	Hand protection should comply with AS 2161, Occupational protective gloves - Selection, use and maintenance. Recommendation: PVC gloves. Plastic or rubber gloves.
Personal Protective Equipment	Final choice of personal protective equipment will depend on individual circumstances and/or according to risk assessments undertaken.
Body Protection	Clean clothing or protective clothing should be worn. Clothing for protection against chemicals should comply with AS 3765 Clothing for Protection Against Hazardous Chemicals.
Hygiene Measures	Always wash hands before smoking, eating or using the toilet. Wash contaminated clothing and other protective equipment before storing or re-using.
Section 9 - Physica	al and Chemical Properties
Form	Solid
Appearance	Colourless crystals or white, crystalline powder or needles.
Odour	Odourless or faint characteristic odour.

Print Date: 1/4/2023

Page: 4 of 6

Infosafe No™	1CHL9 Issue Date :October 2022 RE-ISSUED by CHEMSUPP
Product Name	METHYL 4-HYDROXY BENZOATE
	Classified as hazardous
Melting Point	125-128 °C; 131 °C.
Boiling Point	270-280 °C (decomposition)
Decomposition Temperature	270 - 280 °C
Solubility in Water	Slightly soluble (0.25% (wt/wt) 0 20 $^{\circ}$ C; 0.30% (wt/wt) 0 25 $^{\circ}$ C).
Solubility in Organic Solvents	Very soluble in alcohol; easily soluble in diethyl ether, acetone; soluble in benzene; slightly soluble in carbon tetrachloride and glycerol (1 g/ 70 ml of warm glycerol).
Specific Gravity	1.36
Solubility in Fat	Soluble in oils (1 g/ 40 ml of warm oil) and fats.
рН	~ 5.8 (saturated solution)
Vapour Pressure	Negligible.
Evaporation Rate	Negligible.
Volatile Component	0 %vol @ 21 °C
Partition Coefficient: n-octanol/water (log value)	Log P (o/w): 1.96
Density	Bulk Density: ~ 0.3-0.4.
Flammability	Combustible.
Auto-ignition Temperature	> 600 °C Finely dispersed dust in air in sufficient concentrations, and on exposure to
Explosion Properties Molecular Weight	an ignition source is a potential dust explosion hazard. 152.15
Other Information	Taste: Slight burning taste.

Section 10 - Stability and Reactivity

Chemical Stability	Stable under normal temperatures, pressures and conditions of handling and storage.
Possibility of Hazardous Reactions	Reactive with oxidizing agents, alkalis.
Conditions to Avoid	Heat, flames, ignition sources, dust generation and incompatible materials.
Incompatible Materials	Strong oxidising agents and strong bases.
Hazardous Decomposition Products	Irritating and highly toxic gases, acrid smoke and fumes, including carbon monoxide and carbon dioxide.
Hazardous Polymerization	Will not occur.

Section 11 - Toxicological Information

Acute Toxicity - Oral LD50 (rat): 2100 mg/kg

Ingestion	May cause gastrointestinal tract irritation. Systemic toxicity appears to be low. Large doses may produce gastric upset, stomach discomfort, nausea and diarrhoea. May affect behaviour/nervous system (ataxia, somnolence, flaccid paralysis without anesthesia).
Inhalation	Inhalation of dust may result in respiratory irritation, sore throat, coughing and difficult breathing.
Skin	Skin contact may cause irritation, resulting in redness and itching. Prolonged or repeated skin contact may cause severe and intractable sensitization (contact) dermatitis, in sensitive individuals, an allergic reaction, which becomes evident upon re-exposure to this material. Paraben sensitization may

Product Name METHYL 4-HYDROXY BENZOATE

Classified as hazardous

	occur especially when substance is applied to broken or damaged skin.
Eye	May cause moderate eye irritation, redness, pain, tearing and swelling of eyelids from allergic contact dermatitis.
Carcinogenicity	Not listed in the IARC Monographs.

Chronic Effects Repeated exposure may cause sensitization dermatitis.

Section 12 - Ecological Information

Ecological Information Mobility	No ecological problems are to be expected when the product is handled and used with due care and attention. Distribution: log $P(o/w)$: 1.96.
Bioaccumulative Potential	No appreciable bioaccumulation potential is to be expected (log P(o/w 1-3).
Environmental Protection	Do not allow to enter waters, waste water, or soil!
Acute Toxicity - Fish	Leuciscus idus LCO: 50 - 100 mg/l, 96 h.

Section 13 - Disposal Considerations

DisposalWhatever cannot be saved for recovery or recycling should be handled asConsiderationshazardous waste and disposed of according to relevant local, state and federal
government regulations.

Section 14 - Transport Information

Transport Information Not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.

Section 15 - Regulatory Information

RegulatoryListed in the Australian Inventory of Chemical Substances (AICS).InformationNot Scheduled

Section 16 - Any Other Relevant Information
