Safety Data Sheet

Infosafe No™: 1CH1M  Issue Date: July 2018  RE-ISSUED by CHEMSUPP

Product Name: CALCIUM HYDROXIDE

Classified as hazardous

1. Identification

GHS Product Identifier: CALCIUM HYDROXIDE

Company Name: CHEM-SUPPLY PTY LTD (ABN 19 008 264 211)

Address: 38 - 50 Bedford Street GILLMAN SA 5013 Australia

Telephone/Fax Number:
Tel: (08) 8440-2000
Fax: (08) 8440-2001

Recommended use of the chemical and restrictions on use:
Manufacture of mortar, plaster, cement and other building and paving materials, lubricants, drilling fluids, petrochemicals, fireproof coatings, pesticides, and water-based paints; soil conditioner, disinfectant, water softening agent, food additive, sugar refiner, component of dental cement, accelerator for low grade rubber compounds; used for uranium recovery and in the iron, steel industry and laboratory reagent.

Other Information

EMERGENCY CONTACT NUMBER: +61 08 8440 2000
Business hours: 8:30am to 5:00pm, Monday to Friday.

Chem-Supply Pty Ltd does not warrant that this product is suitable for any use or purpose. The user must ascertain the suitability of the product before use or application intended purpose. Preliminary testing of the product before use or application is recommended. Any reliance or purported reliance upon Chem-Supply Pty Ltd with respect to any skill or judgement or advice in relation to the suitability of this product of any purpose is hereby excluded. This product is not sold by description. Where the provisions of Part V, Division 2 of the Trade Practices Act apply, the liability of Chem-Supply Pty Ltd is limited to the replacement of supply of equivalent goods or payment of the cost of replacing the goods or acquiring equivalent goods.

2. Hazard Identification

GHS classification of the substance/mixture:
- Eye Damage/Irritation: Category 1
- Skin Corrosion/Irritation: Category 2
- Specific target organ toxicity - Single Exposure Category 3 (respiratory tract irritation)
- DANGER

Hazard Statement(s):
- H315 Causes skin irritation.
- H318 Causes serious eye damage.
- H335 May cause respiratory irritation.

Pictogram(s):
- Corrosion, Exclamation mark

Precautionary statement – Prevention:
P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
P280 Wear protective gloves/protection clothing/eye protection/face protection.
P302+P352 IF ON SKIN: Wash with plenty of soap and water.
P332+P313 If skin irritation occurs: Get medical advice/attention.
P362 Take off contaminated clothing and wash before reuse.
P364+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
P312 Call a POISON CENTER or doctor/physician if you feel unwell.
SAFETY DATA SHEET

Product Name: CALCIUM HYDROXIDE

Classified as hazardous

Precautionary statement – Storage
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER or doctor/physician.
P403+P233 Store in a well-ventilated place. Keep container tightly closed.
P405 Store locked up.
P501 Dispose of contents/container to an approved waste disposal plant.

4. First-aid measures

Inhalation: If inhaled, remove from contaminated area to fresh air immediately. Apply artificial respiration if not breathing. If breathing is difficult, give oxygen. Immediately obtain medical aid if cough or other symptoms appear.

Ingestion: Rinse mouth thoroughly with water immediately, repeat until all traces of product have been removed. DO NOT INDUCE VOMITING. Seek medical advice if effects persist.

Skin: Immediately remove contaminated clothing and wash affected area with water for at least 15 minutes. Ensure contaminated clothing is washed before re-use. Seek immediate medical advice/attention depending on the severity.

Eye contact: If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. Immediately irrigate with copious quantity of water for at least 15 minutes. Eyelids to be held open. Seek medical attention.

First Aid Facilities: Eye wash fountains and safety showers should be located near any area where calcium hydroxide is handled.

Advice to Doctor: Treat symptomatically based on judgement of doctor and individual reactions of the patient.

Other Information: For advice, contact a Poisons Information Centre (Phone eg Australia 13 1126; New Zealand 0800 764 766) or a doctor.

5. Fire-fighting measures

Specific Methods: Use extinguishing media most appropriate for the surrounding fire.

Specific hazards arising from the chemical: Material does not burn. Fire or heat may produce irritating, poisonous and/or corrosive gases. Containers may explode when heated. Runoff may pollute waterways.

Precautions in connection with Fire: Wear SCBA and structural firefighter's uniform.

6. Accidental release measures

Personal Precautions: Avoid raising a dust cloud. Evacuate the area of all non-essential personnel. Avoid contact with skin, eyes, nose, mouth.

Personal Protection: Wear protective clothing specified for normal operations (see Section 8)

Clean-up Methods - Small Spillages: Sweep up (avoid generating dust) and using clean non-sparking tools transfer to a clean, suitable, clearly labelled container for disposal in accordance with local regulations.

7. Handling and storage

Conditions for safe storage, including any incompatibilities: Store in air-tight, water-tight containers in a cool, dry place. Store in suitable, labelled containers. Keep containers closed when not in use and when empty. Protect from damage. Avoid any dust build-up by frequent cleaning and suitable construction of storage area.

8. Exposure controls/personal protection

CS: 1.7.2
Safety Data Sheet

Classified as hazardous

Other Exposure Information
A time weighted average (TWA) has been established for Calcium hydroxide (Safe Work Australia) of 5 mg/m3. The exposure value at the TWA is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week.

Appropriate engineering controls
In industrial situations maintain the concentrations values below the TWA. This may be achieved by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. These methods should be used in preference to personal protective equipment.

Respiratory Protection
Where ventilation is not adequate, respiratory protection may be required. Avoid breathing dust, vapours or mists. Respiratory protection should comply with AS 1716 - Respiratory Protective Devices and be selected in accordance with AS 1715 - Selection, Use and Maintenance of Respiratory Protective Devices. Filter capacity and respirator type depends on exposure levels. In event of emergency or planned entry into unknown concentrations a positive pressure, full-facepiece SCBA should be used. If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

Eye Protection
The use of a face shield, chemical goggles or safety glasses with side shield protection as appropriate. Must comply with Australian Standards AS 1337 and be selected and used in accordance with AS 1336.

Hand Protection
Hand protection such as rubber or plastic gloves should comply with AS 2161 Industrial Safety Gloves and Mittens (Excluding Electrical and Medical Gloves).

Personal Protective Equipment
Personal protective equipment should not solely be relied upon to control risk and should only be used when all other reasonably practicable control measures do not eliminate or sufficiently minimise risk. Guidance in selecting personal protective equipment can be obtained from Australian, Australian/New Zealand or other approved standards.

Footwear
Safety boots in industrial situations is advisory, foot protection should comply with AS 2210, Occupational protective footwear - Guide to selection, care and use.

Body Protection
Clean clothing or protective clothing should be worn, preferably with and apron. Clothing for protection against chemicals should comply with AS 3765 Clothing for Protection Against Hazardous Chemicals.

Hygiene Measures
Do not eat, drink or smoke in work areas. Wash hands thoroughly after handling this material. Maintain good housekeeping.

9. Physical and chemical properties

<table>

</table>

Print Date: 13/07/2018
11. Toxicological Information

Acute Toxicity - Oral

Ingestion
May cause a burning sensation, mild corrosion of the mouth, throat and esophagus, and stomach cramps may result.

Inhalation
Dusts or mists may be irritating to the nose, throat and upper respiratory tract.

Skin
Burning sensation and inflammation can result.

Eye
Risk of serious damage to eye.

Carcinogenicity
No evidence of carcinogenic properties.

Mutagenicity
No evidence of mutagenic properties.

12. Ecological information

Ecotoxicity
Harmful effect due to pH shift. Forms corrosive mixtures with water even if diluted. Neutralisation possible in waste water treatment plants.

Persistence and degradability
Methods for the determination of biodegradability are not applicable to inorganic substances. Concentration in organisms is not to be expected.

Acute Toxicity - Fish
Clarias gariepinus LC50: 34 mg/l /96 h.

13. Disposal considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and disposed of according to relevant local, state and federal government regulations.

14. Transport information

Not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.

15. Regulatory information

Listed in the Australian Inventory of Chemical Substances (AICS). Not listed under WHS Regulation 2011, Schedule 10 - Prohibited carcinogens, restricted carcinogens and restricted hazardous chemicals.
